PRESENT RESEARCH AREA

Brief summary (key words).

Experimental psycholinguistics. Monolingual language production. Sentence production. Syntactic priming (Syntactic structure selection). Lexical access. Bilingual language production. Language selection. L2 syntactic encoding (L1 syntax interference on L2 processing). L2 verb agreement encoding. L2 pronoun agreement encoding. Language production and comprehension on dialogue contexts.

PLACE: State College

COUNTRY: UNITED STATES

YEAR: 2004

LENGHT: 04 months 10 days

TOPIC: Colaboration with Prof. Judith F. Kroll (and Dr. Albert Costa Martínez) on a research project investigating the processes of language selection during speech production on bilingual speakers.

KEY: D

CENTRE: The University of Edinburgh

PLACE: Edinburgh

COUNTRY: UNITED KINGDOM

YEAR: 2006-2009

LENGHT: 26 months 24 days (until 24/02/2009)

TOPIC: Post-doctoral research position. During my stay in Edinburgh I've conducted and I'm still conducting research on psycholinguistic topics related to the processing of syntactic information in bilinguals. The main topic of my experiments investigate the way in which both monolinguals and bilinguals construct agreement, in particular comparing agreement between subject and verb and between object and verb in Basque. I've also addressed questions of syntactic priming in English concerned with the way in which speakers make use of information about nouns (particularly homophones).
